

## Weserland Mash getreidefrei

### Speciális takarmányok

### Feed supplement for horses

Mash has always been valuable in equine nutrition, because mash has many positive effects on digestion and regeneration. The cereal and wheat-bran components normally contained in a standard mash were purposely avoided in the formulation of our Weserland Mash, which is cereal-free and full of ingredients to promote a natural digestion.

Extruded linseed provides a high level of mucilage that lines the stomach and intestinal mucosa with a protective film. It can support the health of an intact mucous membrane, but also serves to regenerate the irritated and sensitive mucosa after illness, medication, worming or stress. The addition of unsaturated fatty acids has a positive effect on the skin and coat texture. Brewer's yeast provides important enzymes and natural B vitamins to promote an intact intestinal flora. Milk thistle oil and the easily digestible rice bran additionally provide valuable essential fatty acids, which can positively affect the entire metabolism and the immune system. Alfalfa is characterised by high-quality protein and is therefore ideal to provide the body with amino acids and support muscle growth. Tasty apple pomace provides highly valuable pectins.

Due to the deliberate avoidance of grain, wheat bran and molasses, Weserland Mash is also cereal-free and therefore ideal for metabolically sensitive horses and is optimal for daily feeding as an aid to healing (for example, after colic or difficult coat change).

The benefits at a glance:

- free from grain & wheat bran
- optimal in horses prone to colic or gastric ulcers
- ideal for feeding with metabolic disorders
- high in omega-3 & omega-6 fatty acids
- rich in raw fibre
- very tasty

### takarmányozási javaslat:

#### Feeding recommendation:

ponies: 300 g - 800 g per day

larger horses: 1000 g - 1500 g per day

Ideal 2 - 3 times per week as a replacement for the usual ration.

According to need and performance requirements or to enhance the feed.

Mix the mash with hot water, let it steep for about 10 minutes and feed it warm.

**összetétel:** 21,0 % Gyümölcs(alma)törköly szárítva, 21,0 % Linseed meal, 18,9 %

Rice husk bran, 16,8 % Lenmag (extrudált), 11,2 % Lucerna zöldliszt, 4,6 % kalcium-karbonát, 2,6 % Máriatövis olaj/ Bogáncsolaj, 1,5 % sörtörköly (szárítva), 1,1 % hőkezelt szójadara, 1,0 % sörélesztő

g/kg emészthető fehérje: 135,0 g/kg  
preceacal digestible protein (pcvRp): 104,8 g/kg  
MJ/kg emészthető energia: 13,2 MJ DE/kg  
Metabolizable energy (MJ ME): 11,7 MJ ME/kg

**analitikus összetevők és tartalmak:** 16,30 % nyers-fehérje, 14,20 % Nyers-zsiradék, 13,00 % nyers-rost, 9,60 % nyers-hamu, 1,40 % kalcium, 0,60 % foszfor, 0,50 % nátrium, 6,10 % keményítő, 6,80 % cukor, 0,30 % magnézium

**adalékanyagok/ kg:** 1.465,00 mg Propionsäure aus Calciumpropionat (1a282) <sup>TA</sup>, 350,00 mg Propionic acid (1k280)

NA = tápértékkel rendelkező adalékanyagok  
ZA = állattenyésztés-technológiai adalékanyagok  
TA = technológiai adalékanyagok  
SA = érzékszervi adalékanyagok
